### LURED BY SCENT.

### Rate Caught In Numbers by an Ingenious Means.

of certain drugs, and any brdinary trap set in their haunts is likely to be successful if dressed with these scents, the attraction of which, rat catchers affirm.

MORE DIRECT THAN M'KINLEY'S, patient was thirteen-year-old Isador IEWS OF BARON VON EDELSHEIL Powdered assafetida, eight grains; oil of rhodium, two drams; oil of anisced. Chief Magistrate Works Vigorously. one dram; oil of lavender, one-half dram. Shake together in a bottle and use a very small quantity to dress the bait.

To catch rats, cover a common barre! with stiff, stout paper, tying the edge round the barrel. Place a board so that the rats may have easy access to the top. Sprinkle cheese parings or other food for the rats on the paper for several days until they begin to think that they have a right to their daily rations from this source. Then place in the bottom of the barrel a piece of rock with water until only enough of it projects above the water for one rat to

Now replace the paper, first cutting a cross in the middle, and the first rat that comes on the barrel top goes through into the water and climbs on the rock. The paper comes back to its original position, and the second rat follows the first. Then begins a fight seldom promised definite results or said left part of the brain affects the limbs for the possession of the dry place on the others, who share the same fate .--Baltimore American.

### An Embarrassing Query.

In a city where children above the age of five years have to pay full fare younger go free the passengers in a about something.

Presently he cried: "Mamma! Mam-

The mother, as if with a premonition of something wrong, tried to hush him, but he still kept saying: "Mamma! Mamma !"

"Well, what is it?" she asked at last. "Mamma, when do I have to say I'm

Then the passengers-some of themlaughed and the mother turned very red.-London Answers.

### The Cat and the Tail.

Once upon a time a cat who prided herself on her wit and wisdom was prowling about the barn in search of food and saw a tail protruding from a

"There is the conclusion of a rat," she said.

Then she crept stealthily toward it until within striking distance, when she made a jump and reached it with her claws. Alas, it was not the appendage of a rat, but the tail of a snake, who immediately turned and gave her a mortal bite.

Moral.-It is dangerous to jump at conclusions.

A Good Use For Old Graveyards. There are now in London and its immediate neighborhood 360 public recreation grounds, varying in Epping forest, which, with Wanstead flats, is over 5,000 acres in extent, to little city gardens and playgrounds measuring an eighth or tenth of an acre. These include 100 plots of ground which have been used for interment, parish churchyards and other disused burial grounds, of which the largest is eleven acres and the smallest a few yards square.-Humanitarian.

### Soldiers Are Like Children.

To the medical man the soldier is very like a child-that is to say, he suffers from precisely the same diseases as children. In any large army hospital you will find rows of patients down with measles, scarlatina, diphtheria. mumps and sometimes whooping cough. In fact, the soldiers' hospital is as like as can be to the children's hospital.

much older

men healthy and vigorous. "I was a great sufferer

"I was a great sufferer from dyspepsia for over two years, and was a complete physical wreck."
Lehigh Co., Pa. "I also suffered much with constipation. I tried many different medicines which were recommended to cure the trouble but these only made me worse. I had such a weak and debilitated appearance that is seemed as if I had hardly any blood in my whole body. At last I came across an advertisement of Dr. Pierce's. I at once tried Dr. Pierce's Golden Medical Discovery and 'Pierasant Pellets.' I used about eight vials of the 'Pellets' and ten bottles of the 'Discovery' which brought me back to my former state of health."

Dr. Pierce's Pellets cures constipation.

Dr. Pierce's Pellets cures constipation.

### THE NATIONAL CAPITAL

Rats are very susceptible to the odor President Roosevelt's Way of Doing Business.

Has an Effective Method of Terminating an Interview-Decoration of

business is very different from that of saw the boy in the early part of last any of his predecessors, writes the May and gave him frequent examina-York Post. Considerable formality al. a lack of co-ordination in his muscular ways attended White House conferences in the past. President McKinley sat at his desk in his executive office, about six or seven inches high, filling and visitors were shown into the anteroom, where they waited until their turn came for an interview. Then they side. went before the president and set forth their business. He would listen, occawould announce that he would take the matter under consideration. He the stone, the noise of which attracts the caller would learn by mail or otherwise that the president had or had not done what he asked.

President Roosevelt's way is more inner room except for cabinet meeton the tramcars while those who are now held in the large room adjoining. sert a pair of rongeur forceps, with During receiving hours this fills up un- which the skull would be clipped car saw one day a rather large boy. til there may be forty or fifty persons away. Before this the skin of the looking seven years old at least, held in in waiting. Mr. Roosevelt goes at his scalp had been laid back in flaps. his mother's lap as though he were a task with vigor. He will seize a caller baby. The big child seemed restless by the hand, almost wring it off and frequently begin talking before the other has had time to state the occasion for his presence. "Glad to see you! Glad to see you!" he will exclaim. Possibly it will be an old acquaintance, and Roosevelt will direct a few lightning questions at him. "What regiment? Oh, yes. Knew your brother. How's Sam? When did you get back?" It may chance to be a congressman in search of an appointment for a constituent. "Can't do it! Can't do it! All full! Mighty sorry! Come again! Goodby! And the hopes of the congressman and constituent are blasted in a twinkling. With others he will argue more at length, but just as vigorously. The visitor will be making a nice little prepared speech, when Roosevelt will cut go on improving." in: "Now, right there! That's where you are all wrong. It's like this"-And in a moment he is pounding one fist into the other palm and sweeping the air like a walking beam on the double quick.

His method of terminating an interview is effective. Out goes his hand, It grasps that of the visitor in an eager farewell which almost takes him off his feet. "Goodby!" And it is all done. Before this victim can recover the after. president is wringing the hand of a new one.

In a pawnshop in Washington a collector has just discovered a sash and in Boston harbor, alongside of the decoration worn by Maximilian, archduke of Austria, who was placed on the throne of Mexico and ruled till his overthrow and death on June 19, 1867. The Austrian embassy is much interested in the discovery and has taken steps to communicate with Maximilian's relatives in Europe, who will doubtless wish to recover it. The sash is of blue and purple moire silk, and attached to it is the badge of the Order of Isabella in beautiful enamel. On the reverse side is the motto, "Al Merito y Virtudes." With the sash is the star of the order, eight pointed and surrounded by a laurel wreath. The whole is in the original shagreen case bearing the mark of the maker, who was jeweler to the imperial court at Vienna. The star and mountings are of silver, plated with gold and heavily enameled.

The wife of Maximilian, Carlotta is still living, though hopelessly insane and confined in an asylum under the guardianship of the Austrian government. She is the daughter of King Leopold I. of Belgium, She was crowned queen of Mexico when her husband became king. The family relics fell into the hands of an unworthy scion of the illustrious family, who married a South Carolina woman. The man who pawned this sash used to be well known in Washington diplomatic circles. His habits were such that finally there was nothing he would not pledge in order to raise money.

Dr. Mary Walker of Washington, the eccentric woman suffragist, whose advanced ideas on the subject of woman's rights caused her to adopt man's attire many years ago, will not lose her pension because of her utterances regarding the assassination of the late president, says the New York Sun. This statement is made on the authority of Commissioner of Pensions Evans, who says that even if it could be proved that Dr. Walker had uttered the alleged treasonable sentiments there is no law under which she could be deprived of her pension. Dr. Mary Walker's husband was a soldier in the Union army and served with Sherman in the famous march to the sea.

The syndicate of western electric railroad men headed by Henry Everett of Cleveland, O., is making progress, it is reported, in the development of the enterprise it has in hand in Washington. As will be recalled, the syndicate acquired last spring the charter obtained from the legislature of Maryland authorizing the building of an electric road between Washington and Annapolis and from the latter place to Baltimore, says the Washington Star. Since then the work of surveying several tentative lines has been going on. .

### RESTORING THE MIND.

### Idiotic Boy Cured by Daring Surgical Operation.

which consisted in removing a portion of an abnormally thick or misshaped skull, was recently performed by Dr Levine, also of New York, who has been an idiot from birth. The boy is now able to learn, and his education has been begun.

"Before I performed the operation," Maximilian Found in a Washington said Dr. Sternberg the other day to a reporter of the New York Journal, "there had been two successful cases President Roosevelt's way of doing out of ten attempts in Paris. I first Washington correspondent of the New tions. He was quite insane. There was movements, no concentration of mind. and his eyes were not responsive to any light of intelligence. I found a considerable depression on the left side of the top of the skull, which showed a great contrast to that of the right

"I came to the conclusion that the boy's mental condition resulted from sionally asking a question to bring out the undue pressure of the skull upon some new aspect, and when the visitor the left side of the brain. Partial pahad completed his story Mr. McKinley ralysis of some of the right muscles and limbs helped me to this conclusion, As is well known, an affliction of the what he would be likely to do. Later on the opposite side of the body, and vice versa.

"The operation lasted just twentyfive minutes. I first of all trephined the boy's skull just over the left eye, direct. He has almost abandoned the removing a circular piece of bone the size of a five cent piece, which enings, and most of the interviews are abled me to examine the brain and in-

> "With the forceps I chiseled out a strip of the patient's skull about six inches in length by one and a half inches wide at the front to two inches wide at the back.

> "That my diagnosis was correct was immediately demonstrated, as the brain sprung up through the orifice like a sponge. After antiseptic treatment the scalp was replaced. One of the instantaneous results of the operation when the patient regained consciousness was that the pupils of the eyes became sensitive to light and contracted in response to increased illumination. Since then the lad's mental capacity has gradually increased. He is a well boy and has commenced to go to a school of elementary instruction, and, in my opinion, he will

### LARGEST SCHOONER OF ALL Seven Master Building Will Require Crew of Only Sixteen.

The largest schooner in the world is now being built and is remarkable chiefly because she will have seven masts, two more than the largest ships and one more than has ever appeared from the deck of a fore and

The first seven master has been de signed by D. D. Crowninshield and is being built in the Fore River shipyard cruiser Des Moines, and is more than 100 feet longer than that vessel, says the New York Press.

The new seven master, which will carry 8,000 tons of coal, will have all the modern equipment, steam winches and sail hoists, steam steering gear and a double steel bottom, capable of holding 1,200 tons of water ballast. This vessel will cost about \$250,000. and her ability to pay for herself will depend largely upon the fact that she will require a crew of only sixteen men, less than half the number necessary for working an ordinary square rigged ship.

Captain J. C. Crowley, for whom she is being built, has settled the question of the nomenclature of the masts by calling them respectively fore, main, mizzen, spanker, jigger, driver and

English Good Sense on the Canal. When once the isthmian canal is made by the United States, opened to the whole world on equal terms and held so strongly that no power at war with Great Britain will be able to violate its neutrality, the nation will reaiize that instead of the abrogation of the Clayton-Bulwer treaty proving an injury it is a great benefit, says the London Spectator. The notion that America, though she will make, work and hold the canal, should bind herself to preserve its neutrality as regards a power with which she is at war, is absurd. Such a stipulation would not and could not be observed for ten minutes after war had been declared. An American isthmian canal, like everything else American, will be used against America's enemies in case of war. Whatever the jurists may say, we should do the same in the case of the Suez canal.

### Li Hung Chang's Frank Reply. Li Hung Chang visited Philadelphia on Sept. 3, 1896, when Charles F. Warwick was mayor, says the Philadelphia Times. The procession started down Broad street. It was soon after this that Mayor Warwick, pointing to the crowds which lined the streets,

said: "Your excellency, Philadelphia is famons for its beautiful women." Li was quiet a few minutes and then

made the famous reply: "I have not seen any yet."

Fitzsimmons Now a Citizen. Robert Fitzsimmons, the pugilist, has just received his citizenship papers before Judge Aspinwall in Brooklyn. He said he was an actor, and he carried his certificate away with a very serious air. - New York Post.

laims One Hundred Thousand Men Coast In About Thirty Hours-Quick Naval Action Might Gain Temporary Success-As to War With Americans.

States.

ermany must one day be involved in conflict because the growth of her tific and commerce is a source of dinger to England. He holds the opinin that Germany might hope to secure sme success at sea shortly after hoslities began, as the German navy would start mobilization first, but be fre long England would be able to set seh powerful naval forces in action the Germany would be reduced to defasive tactics, in which success could net be reckoned upon. His paper pro-

\*England's weakness is our strength. The land forces of the English army correspond neither in strength nor in quality with her position as a great power. England is convinced that ever hostile invasion can be prevented by her fleet, but this conviction is not not so overwhelming that an opponent | m. essentially weaker at sea who has everything ready may not have a chance of scoring a temporary success. Germany must throw part of her land forces on the English coast and thus bring the conflict to an issue on land, where German troops are much superior to English."

After summing up the shortcomings

time to mobilize. He observes:
"We must also take account of their slight fighting value compared with well trained German troops. The only troops ready in England for action are three divisions of the First army corps, about two divisions of the Second and a combined division of the Third, to gether with three cavalry brigades. The strength of an English division on a war footing is only 10,000 men, while a similar German division numbers about 16,000 men. Germany can transport six infantry divisions or one cavalry brigade and five infantry divisions to England in a very short time. How the operation could be carried out must not, of course, be explained here, but this can be said, that it can be done within little more than thirty hours in favorable weather from German harbors in the North sea. Large tracts of the English coast furnish good landing places for troops, and the country itself has so many resources that an invading army could live on them for a long time. On the other hand, the island is not large enough to allow English troops to destroy a once victorious hostile army. It is unlikely that such a war would last very long, and considerable re-enforcements would, therefore, not be needed."

A new kind of moose call, says the Kennebec Journal, is in use down in Washington county. It is the whistling buoy near the entrance of Moosabec reach, and it is said to be the cause of the big bull moose which for several weeks has been known to frequent the shore in that section lingering in that vicinity. With the wind blowing from the east the blast of the buoy is heard several miles inland, and the sound at this distance is said by old hunters to closely resemble the trumpetings of a moose. It is alleged even that the wandering moose has been heard to respond with answering call when the

### Grewsome Find In Mexico

Workmen employed in the Veladora mine, situated near Monterey, Mexico, recently opened up a large cavern by means of a tunnel. In it were found the skeletons of fifteen men, surrounded by ancient mining tools, says the New York Times. Piled up in the cavern were more than two carloads of horn silver and galena, with wire silver, all of great richness. The old Spanish records show that this mine was worked more than 200 years ago, and the skeletons are of miners who are supposed to have been suffocated by a cavein.

### In Memory of Sir Walter Raleigh.

A project is on foot to erect a memorial to Sir Walter Raleigh in recognition of his services to mankind in introducing tobacco and the potato into Europe. The funds will be raised by public subscription. It is proposed to erect the memorial at Raleigh, N. C.

Conflict With England.

Could Be Landed on the English

Considerable attention is attracted in Berlin by a pamphlet just published w Baron von Edelsheim, an officer in he chief general staff of the German rmy, in which he declares that Gerany could throw 100,000 men on the inglish coast within a very short time. he baron put forward his statement a matter of absolute certainty, and is considered somewhat curious that e is permitted by his government to pblish it, says the New York Sun. He so discusses the possibility of landing pops in Russia and France and proeds to contemplate the hypothesis of war between Germany and the Unit-

He starts from the assumption that

of England's land forces the baron declares that only her present standing army and regular reserve can be counted on in case of sudden invasion, as the others would take a considerable
